Recently qualified in front-end development, solving problems using code is a great passion of mine and armed with a cup of coffee, I am keen to pursue front-end development professionally.

💼 EXPERIENCE

Field Service Technician | Flowbird Transport LTD.

2018 – 2023

Responsible for the installation and decommissioning of London Transport ticketing equipment.

- Installing and commissioning ticketing equipment
- Decommissioning of outdated ticketing equipment
- On site repairing, servicing and maintenance of ticketing equipment as required
- Working in a team to carry out upgrades to ticketing equipment as required
- Accurate record keeping

Field Service Technician | Parkeon Transit LTD (later known as Flowbird Transport LTD)

2006 – 2018

Working to maintain the smooth running of the London Transport ticketing system.

- Project managed teams to deliver mass upgrades (8000+ buses) as required
- On site repairing or replacing of faulty ticketing equipment
- Servicing and maintaining ticketing equipment

Field Service Technician | Wayfarer Service Division (later known as Parkeon Transit LTD)

2002 – 2006

Successfully delivered the initial rollout of the Oyster reader system for London Transport buses. As part of a team, my responsibilities included carrying out the installation and ongoing testing of ticketing equipment.

Electronics Technician | Fargo Electronics Jamaica LTD.

1992 - 2001

My initial role included inspecting, rectifying, and testing of printed circuit boards. The role progressed to include component level fault finding and repairing.
